Performing Low-Level Manipulation of Memory Testing and Manipulating Bits 3-14 Performing Logical Operations on Long Words Extracting a Word From a Long Word 3-18 Hardcoding Byte Values 3-19 Compressing Data 3-20 Obtaining Pseudorandom Numbers 3-22 Using Fixed-Point Data Types 3-24	About the Mathematical and Logical Utilities 3-3
Reversed Bit-Numbering 3-7 Data Compression 3-8 Pseudorandom Number Generation 3-9 Fixed-Point Data Types 3-11 Angle-Slope Conversion 3-12 Using the Mathematical and Logical Utilities 3-14 Performing Low-Level Manipulation of Memory 3-14 Testing and Manipulating Bits 3-14 Performing Logical Operations on Long Words Extracting a Word From a Long Word 3-18 Hardcoding Byte Values 3-19 Compressing Data 3-20 Obtaining Pseudorandom Numbers 3-22 Using Fixed-Point Data Types 3-24 Mathematical and Logical Utilities Reference 3-27 Data Structures 3-27 64-Bit Integer Record 3-27 Routines 3-27 Testing and Setting Bits 3-28 Performing Logical Operations 3-30 Getting and Setting Memory Values 3-32 Compressing and Decompressing Data 3-34 Obtaining a Pseudorandom Number 3-36	Bits, Bytes, Words, and Long Words 3-4
Data Compression 3-8 Pseudorandom Number Generation 3-9 Fixed-Point Data Types 3-11 Angle-Slope Conversion 3-12 Using the Mathematical and Logical Utilities 3-14 Performing Low-Level Manipulation of Memory 3-14 Testing and Manipulating Bits 3-14 Performing Logical Operations on Long Words Extracting a Word From a Long Word 3-18 Hardcoding Byte Values 3-19 Compressing Data 3-20 Obtaining Pseudorandom Numbers 3-22 Using Fixed-Point Data Types 3-24 Mathematical and Logical Utilities Reference 3-27 Data Structures 3-27 64-Bit Integer Record 3-27 Routines 3-27 Testing and Setting Bits 3-28 Performing Logical Operations 3-30 Getting and Setting Memory Values 3-32 Compressing and Decompressing Data 3-34 Obtaining a Pseudorandom Number 3-36	Bit Manipulation and Logical Operations 3-7
Pseudorandom Number Generation 3-9 Fixed-Point Data Types 3-11 Angle-Slope Conversion 3-12 Using the Mathematical and Logical Utilities 3-14 Performing Low-Level Manipulation of Memory 3-14 Testing and Manipulating Bits 3-14 Performing Logical Operations on Long Words Extracting a Word From a Long Word 3-18 Hardcoding Byte Values 3-19 Compressing Data 3-20 Obtaining Pseudorandom Numbers 3-22 Using Fixed-Point Data Types 3-24 Mathematical and Logical Utilities Reference 3-27 Data Structures 3-27 64-Bit Integer Record 3-27 Routines 3-27 Testing and Setting Bits 3-28 Performing Logical Operations 3-30 Getting and Setting Memory Values 3-32 Compressing and Decompressing Data 3-34 Obtaining a Pseudorandom Number 3-36	Reversed Bit-Numbering 3-7
Fixed-Point Data Types 3-11 Angle-Slope Conversion 3-12 Using the Mathematical and Logical Utilities 3-14 Performing Low-Level Manipulation of Memory 3-14 Testing and Manipulating Bits 3-14 Performing Logical Operations on Long Words 3-16 Extracting a Word From a Long Word 3-18 Hardcoding Byte Values 3-19 Compressing Data 3-20 Obtaining Pseudorandom Numbers 3-22 Using Fixed-Point Data Types 3-24 Mathematical and Logical Utilities Reference 3-27 Data Structures 3-27 64-Bit Integer Record 3-27 Routines 3-27 Testing and Setting Bits 3-28 Performing Logical Operations 3-30 Getting and Setting Memory Values 3-32 Compressing and Decompressing Data 3-34 Obtaining a Pseudorandom Number 3-36	Data Compression 3-8
Angle-Slope Conversion 3-12 Using the Mathematical and Logical Utilities 3-14 Performing Low-Level Manipulation of Memory 3-14 Testing and Manipulating Bits 3-14 Performing Logical Operations on Long Words 3-16 Extracting a Word From a Long Word 3-18 Hardcoding Byte Values 3-19 Compressing Data 3-20 Obtaining Pseudorandom Numbers 3-22 Using Fixed-Point Data Types 3-24 Mathematical and Logical Utilities Reference 3-27 Data Structures 3-27 64-Bit Integer Record 3-27 Routines 3-27 Testing and Setting Bits 3-28 Performing Logical Operations 3-30 Getting and Setting Memory Values 3-32 Compressing and Decompressing Data 3-34 Obtaining a Pseudorandom Number 3-36	Pseudorandom Number Generation 3-9
Performing Low-Level Manipulation of Memory Testing and Manipulating Bits 3-14 Performing Logical Operations on Long Words Extracting a Word From a Long Word 3-18 Hardcoding Byte Values 3-19 Compressing Data 3-20 Obtaining Pseudorandom Numbers 3-22 Using Fixed-Point Data Types 3-24 Wathematical and Logical Utilities Reference 3-27 Data Structures 3-27 64-Bit Integer Record 3-27 Routines 3-27 Testing and Setting Bits 3-28 Performing Logical Operations 3-30 Getting and Setting Memory Values 3-32 Compressing and Decompressing Data 3-34 Obtaining a Pseudorandom Number 3-36	Fixed-Point Data Types 3-11
Performing Low-Level Manipulation of Memory Testing and Manipulating Bits 3-14 Performing Logical Operations on Long Words Extracting a Word From a Long Word 3-18 Hardcoding Byte Values 3-19 Compressing Data 3-20 Obtaining Pseudorandom Numbers 3-22 Using Fixed-Point Data Types 3-24 Mathematical and Logical Utilities Reference 3-27 Data Structures 3-27 64-Bit Integer Record 3-27 Routines 3-27 Testing and Setting Bits 3-28 Performing Logical Operations 3-30 Getting and Setting Memory Values 3-32 Compressing and Decompressing Data 3-34 Obtaining a Pseudorandom Number 3-36	Angle-Slope Conversion 3-12
Testing and Manipulating Bits 3-14 Performing Logical Operations on Long Words 3-16 Extracting a Word From a Long Word 3-18 Hardcoding Byte Values 3-19 Compressing Data 3-20 Obtaining Pseudorandom Numbers 3-22 Using Fixed-Point Data Types 3-24 Mathematical and Logical Utilities Reference 3-27 Data Structures 3-27 64-Bit Integer Record 3-27 Routines 3-27 Testing and Setting Bits 3-28 Performing Logical Operations 3-30 Getting and Setting Memory Values 3-32 Compressing and Decompressing Data 3-34 Obtaining a Pseudorandom Number 3-36	Jsing the Mathematical and Logical Utilities 3-14
Performing Logical Operations on Long Words Extracting a Word From a Long Word 3-18 Hardcoding Byte Values 3-19 Compressing Data 3-20 Obtaining Pseudorandom Numbers 3-22 Using Fixed-Point Data Types 3-24 Mathematical and Logical Utilities Reference 3-27 Data Structures 3-27 64-Bit Integer Record 3-27 Routines 3-27 Testing and Setting Bits 3-28 Performing Logical Operations 3-30 Getting and Setting Memory Values 3-32 Compressing and Decompressing Data 3-34 Obtaining a Pseudorandom Number 3-36	Performing Low-Level Manipulation of Memory 3-14
Extracting a Word From a Long Word 3-18 Hardcoding Byte Values 3-19 Compressing Data 3-20 Obtaining Pseudorandom Numbers 3-22 Using Fixed-Point Data Types 3-24 Wathematical and Logical Utilities Reference 3-27 Data Structures 3-27 64-Bit Integer Record 3-27 Routines 3-27 Testing and Setting Bits 3-28 Performing Logical Operations 3-30 Getting and Setting Memory Values 3-32 Compressing and Decompressing Data 3-34 Obtaining a Pseudorandom Number 3-36	Testing and Manipulating Bits 3-14
Hardcoding Byte Values 3-19 Compressing Data 3-20 Obtaining Pseudorandom Numbers 3-22 Using Fixed-Point Data Types 3-24 Mathematical and Logical Utilities Reference 3-27 Data Structures 3-27 64-Bit Integer Record 3-27 Routines 3-27 Testing and Setting Bits 3-28 Performing Logical Operations 3-30 Getting and Setting Memory Values 3-32 Compressing and Decompressing Data 3-34 Obtaining a Pseudorandom Number 3-36	Performing Logical Operations on Long Words 3-10
Compressing Data 3-20 Obtaining Pseudorandom Numbers 3-22 Using Fixed-Point Data Types 3-24 Mathematical and Logical Utilities Reference 3-27 Data Structures 3-27 64-Bit Integer Record 3-27 Routines 3-27 Testing and Setting Bits 3-28 Performing Logical Operations 3-30 Getting and Setting Memory Values 3-32 Compressing and Decompressing Data 3-34 Obtaining a Pseudorandom Number 3-36	e e
Obtaining Pseudorandom Numbers 3-22 Using Fixed-Point Data Types 3-24 Mathematical and Logical Utilities Reference 3-27 Data Structures 3-27 64-Bit Integer Record 3-27 Routines 3-27 Testing and Setting Bits 3-28 Performing Logical Operations 3-30 Getting and Setting Memory Values 3-32 Compressing and Decompressing Data 3-34 Obtaining a Pseudorandom Number 3-36	•
Using Fixed-Point Data Types 3-24 Mathematical and Logical Utilities Reference 3-27 Data Structures 3-27 64-Bit Integer Record 3-27 Routines 3-27 Testing and Setting Bits 3-28 Performing Logical Operations 3-30 Getting and Setting Memory Values 3-32 Compressing and Decompressing Data 3-34 Obtaining a Pseudorandom Number 3-36	
Mathematical and Logical Utilities Reference 3-27 Data Structures 3-27 64-Bit Integer Record 3-27 Routines 3-27 Testing and Setting Bits 3-28 Performing Logical Operations 3-30 Getting and Setting Memory Values 3-32 Compressing and Decompressing Data 3-34 Obtaining a Pseudorandom Number 3-36	
Data Structures 3-27 64-Bit Integer Record 3-27 Routines 3-27 Testing and Setting Bits 3-28 Performing Logical Operations 3-30 Getting and Setting Memory Values 3-32 Compressing and Decompressing Data 3-34 Obtaining a Pseudorandom Number 3-36	71
64-Bit Integer Record 3-27 Routines 3-27 Testing and Setting Bits 3-28 Performing Logical Operations 3-30 Getting and Setting Memory Values 3-32 Compressing and Decompressing Data 3-34 Obtaining a Pseudorandom Number 3-36	~
Routines 3-27 Testing and Setting Bits 3-28 Performing Logical Operations 3-30 Getting and Setting Memory Values 3-32 Compressing and Decompressing Data 3-34 Obtaining a Pseudorandom Number 3-36	
Testing and Setting Bits 3-28 Performing Logical Operations 3-30 Getting and Setting Memory Values 3-32 Compressing and Decompressing Data 3-34 Obtaining a Pseudorandom Number 3-36	•
Performing Logical Operations 3-30 Getting and Setting Memory Values 3-32 Compressing and Decompressing Data 3-34 Obtaining a Pseudorandom Number 3-36	
Getting and Setting Memory Values 3-32 Compressing and Decompressing Data 3-34 Obtaining a Pseudorandom Number 3-36	8
Compressing and Decompressing Data 3-34 Obtaining a Pseudorandom Number 3-36	0 0 1
